Environmental policy

To achieve these goals, the Company Management is committed to:

- Make use of internal or external specialist advice to regularly monitor the implementation of laws and regulations in force, by integrating them with the systematic evaluations carried out by those in charge, to limit the risks of events and complaints/sanctions by the appropriate bodies;
- Promote information and training to all staff on the environment in relation to their activities and to this policy, in order to involve them in the environment protection and prevention for them and for others;
- Comply with the provisions of environmental and safety laws;
- Ensure rational use and conservation of energy;
- Prevent uncontrolled emissions on the ground and in the atmosphere;
- Prevent the risk of fire;
- Ensure compliance with the emission limit values in the atmosphere;
- Promote information and training to all staff with the aim of reducing the consumption of natural resources;
- Improve waste management activities - complying with waste separation criteria - to encourage separate collection by promoting recovery and/or recycling rather than disposal;
- Make an effective use of natural resources necessary for production processes - such as energy and water - by promoting consumption reduction activities;
- Involve contracting companies by encouraging them to correctly manage the aspects, by organizing regular meetings to identify the significant aspects and the potential impacts during construction activities and to identify the actions/instruments to prevent or limit them, by regularly monitoring their implementation and analysing the findings with them.

In order to achieve the above objectives, the Management is committed to providing adequate resources in terms of equipment, machinery, human resources and training at all levels.
